Regulatory Income Statement – Supplementary Information

Objective of this Reporting Standard

This Reporting Standard sets out requirements for the provision of information to APRA relating to a private health insurer's supplementary information for its regulatory income statement.

It includes associated specific instructions and must be read in conjunction with *Prudential Standard HPS 115 Capital Adequacy: Insurance Risk Charge*, and *Prudential Standard HPS 340 Insurance Liability Valuation*.

Authority

1. This Reporting Standard is made under section 13 of the *Financial Sector (Collection of Data) Act 2001*.

Purpose

2. The information reported to APRA under this Reporting Standard is used by APRA for the purpose of prudential supervision.

Application and commencement

Note: For the avoidance of doubt, if the due date for a particular reporting period falls on a day other than a usual business day, a private health insurer is nonetheless required to submit the information required no later than the due date.

Quality control

10. All information provided by a private health insurer under this Reporting Standard must be subject to systems, processes and controls developed by the private health insurer for the internal review and authorisation of that information.  - (c) the records of the health benefits fund and general fund have been accurately compiled so as to permit the private health insurer to fairly state the information required by this Reporting Standard.
14. If a private health insurer received a qualified auditor's report for a health benefits fund for the previous year (previous report), the current year's auditor's report must state whether the auditor has examined the issues identified and is satisfied that the private health insurer has taken the appropriate steps to rectify the matters raised in the previous report.
15. The auditor's report must:
 - (a) state details of the program adopted to carry out the audit; and
 - (b) include the name of, and be signed by, the auditor who takes responsibility for the accuracy of the report.
